"Kumamon" Boat

Approximately 200 Indian Ocean Bottlenose Dolphins have always lived in the sea between the Hayasaki-straights and Ariake sea in Amakusa. Tourists can enjoy a 98% chance of encountering these dolphins throughout the year. There are many places throughout Japan and the world where you can see dolphins, however, it is rare for them to stay in one place without migrating. The dolphin watching cruise will give you a chance to witness the nature and the strength of life, and we hope you will enjoy the beautiful scenery of Mt. Unzen and islands of Amakusa and become aware of the importance of protecting the natural environment.
